

Maximize opportunities to win customers

SalesON makes it easy to manage your sales team's activities, making teamwork more dynamic.

SalesON empowers salespeople to drive customer engagement with useful information that emerges from the relationship and providing the data your business needs to make better decisions.

See what customers are saying:

"Grupo FYTTSA accomplished to capture and process relevant information for analysis, statistics and planning. The impact has been robust, with 60% savings in transportation costs and another 40% in gasoline costs."

Jeroboam Sánchez; Process Director Grupo Fytsa

WHAT WE OFFER

ATX SALES ON is a powerful CRM that integrates functionalities to manage the objectives of your sellers or stores. Convert relationships into revenue, go beyond sales management software by incorporating efficient business processes and digital intelligence into every sale.

GIVE YOUR ORGANIZATION USEFUL INFORMATION

- Identify important prospects, opportunities, and projects.
- Improve customer engagement through intelligent information, analyzing all customer data in real time.

INCREASE SALES PRODUCTIVITY

- Recruit, get on board and strengthen your partners channel through deeper qualification and activation
- Sell smarter, anywhere using rich, modern mobile apps that provide contextual news, social data, and task flows.

BOOST SALES PERFORMANCE

- Manage your opportunity funnel with pre-built and interactive control panel, in a natural language.
- Turn work into play by letting salespeople team up to collaborate and compete in fun and engaging competitions.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a business' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enable business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Transform on your terms with Microsoft Business Applications. Enable people to do their best work. Gain actionable insights. Thrive with solutions expressly built for change. Unlock next.
